

What is Elesse?

Elesse is a higher specification of the VE model. Currently, you can order the VE15/VE25 with the Elesse specification, which makes the final elevator even more luxurious and really stands apart from the crowd.

With features like internal mirrors, upgraded pushbutton controls, power door as standard, attractive sidepanel glazing and metal push button controls, this is THE premium home elevator.

Door Locking: One of our most frequently asked questions is about opening the door when the lift is moving. Short answer; they won't, thanks to our smart 'interlocking' system.

Safety Sensors: Quickly bring the elevator to a halt if they sense something is in the way.

Trapboard: The trapboard serves as an aesthetic and safety feature. It offers a code compliant fire seal in both directions. Additionally, the upstairs

Illuminated Push Button Controls: Intuitive, power at your fingertips!

Battery Backup Lighting: Ensuring you won't get left in the dark in the event of a power outage. Set on a timer, they will turn off when the elevator has not been used for a while.

Glazing: Our VE has been designed to be as bright and as open as possible.

Level Access (no pit): The floor of the elevator is designed to allow things to be wheeled in and out of the elevator car, without a pit construction.

Power Door: Comes as standard with the Elesse Spec.

The VE

A Guided Tour

The VE is a Residential Elevator that is functional, minimalistic and reliable. It comes in a range of size options to suit your needs and is our best selling Home Elevator in the USA.
